- Git
- Agile
- React
- Laravel
- CSS
- MySQL
- Figma
- Typescript
- Node.js
- Tailwind
- REST
- Jest

## Professional Experience

SportsGamer

10/2023 - Current

### Intermediate Full-stack Developer

Montreal, QC

- Identified problems through the platform and organized solutions to create a proper UI/UX and a cleaner backend architecture.
- Implemented several components, endpoints and queries to answer the needs of the client.
- Managed and streamlined the server maintenance and deployment process, making it 80% faster.
- Developed essential features and delivered tasks in time and with great quality.

Logient

11/2022 - 09/2023

### Intermediate Full-stack Developer

Montreal, QC

- Produced code using the clean architecture in order to create microservices.
- Restructured and refactored the code using sonar cloud, which led to a diminution of 90% of the errors and issues.
- Contributed in different team meetings, such as task descriptions, time estimations, scrums and sprint reviews.
- Improved understanding of git flow and related tools (GitKraken) to help implement version control, reducing work time for these processes by close to 50%.
- Adapted quickly to a bigger team of 15 persons as well as a new code architecture.

C2 International

07/2021 - 10/2022

### Full-stack Developer

Montreal, QC

- Acquired the confidence to give ideas, receive advice, and work comfortably within a team.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements.
- Reviewed code, debugged problems and corrected issues to provide the users with a fluid experience.
- Collaborated in requirements gathering to solidify prerequisites and determine the best technical solution to meet business needs.
- Led a smaller team of 3 persons to create a dynamic navigation bar to enhance the user experience on the platform.

Courrier Diakite

07/2019 - 06/2021

### Full-stack Developer

Montreal, QC

- Overhauled over 500 000 lines of code and transitioned them from Symfony to Laravel to increase work speed and clarity.
- Facilitated the platform upgrade by finding solutions that are both robust and efficient, making it 13% faster.
- Evaluated the client's requests and proposed efficient solutions to ease the user experience.
- Inspected the code to upgrade the responsiveness of the platform, from 10% to 95% coverage.
- Upgraded and streamlined several frontend and backend components to reduce the risk of errors by 60%.

## Personal project

Voile 4 vents

- Oversaw the creation of the platform from the beginning to the end to create a product that answers the needs of the client and the users. This increased sales by almost 15%.
- Researched the market to optimize the product and ensure the best user experience, which increased traffic by 30%.
- Established the appropriate stack to make an efficient platform while finding opportunities to learn new technologies.
- Organized the hosting cycle to find a robust solution that is simple to use for the client and reduced the cost by 25%.
- Partnered with a photographer to take high quality pictures and videos for the website.

## Education and Training

Full stack web development diploma

07/2019

Micro-degree in web development

12/2017

Bachelor's Degree in Biological Science, oriented in biodiversity, ecology and evolution

2013/09-2016/04
